## Vacuum Switch

The INFICON Vacuum Switch VSC150 is an absolute pressure switch with an adjustable electrical switching contact from 0.5 to 2000 mbar. The mechanical design allows short therm overload of 3000 mbar without impairing the switching accuracy of $\pm 0.1$ mbar. INFICON offers customer specific adjustment of pressure switch.

## ADVANTAGES

- High switching accuracy ( $\pm 0.1$ mbar)
- Stable long term operating characteristics
- Rugged, corrosion protected design
- Increased switching capability when using switching amplifier
- Switching contacts (normally closed) in the reference chamber and thus protected against process media
- Adapter available for differential pressure measurement

## APPLICATIONS

- Pressure switch or differential pressure switch to control valves, pumps, power supplies
- Load lock chambers
- Process chambers
